1. Introduction

What is UniVerse?

UniVerse is a social platform built around university life. It connects students with societies, clubs and organisations on and around campus, as well as with each other – giving them an easy way to discover events, book tickets, stay up to date with everything happening at university, and find new people to connect with. Whether you're a student looking for your next event, or an organisation trying to reach your audience, UniVerse brings it all together in one place.

What does this handbook cover?

It will be split into two sections:

Students:

Discovering events, booking tickets, following organisations, sharing your favourite moments from your events

Organisations:

Creating and managing events, scanning tickets at the door, and sharing posts to promote events.

2. Getting started

Downloading the app

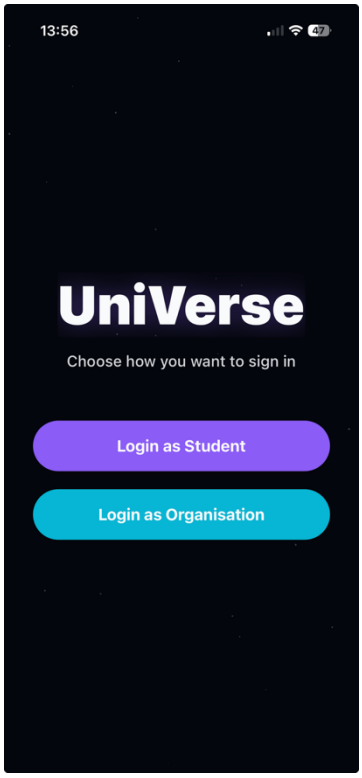
UniVerse is available on IOS via TestFlight. You will be provided with a link to install the app onto your device; simply tap the link on your iPhone, install TestFlight from the app store if prompted, then follow the on-screen steps to install UniVerse.

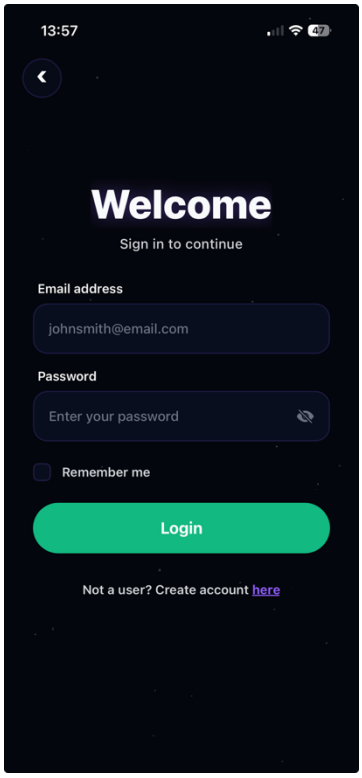
Creating an account

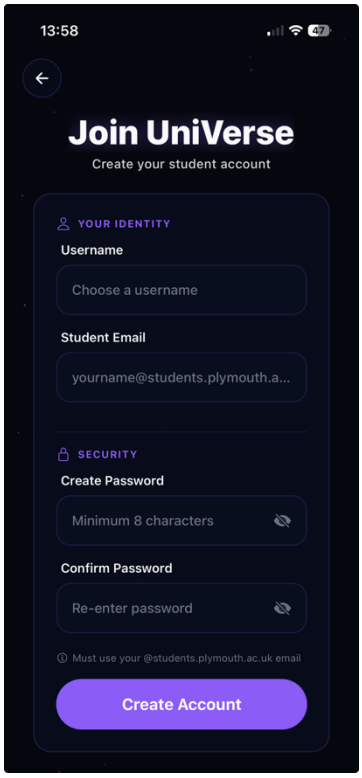
When you open the app, you will initially be presented with a welcome screen with two options – **Student** or **Organisation**.

Student registration:

- Tap "Login as Student" then the text at the bottom to create an account
- Enter a username, your university email address (must end in @students.plymouth.ac.uk), and a password, which must include at least 8 characters, including a number
- Tap "Create Account"

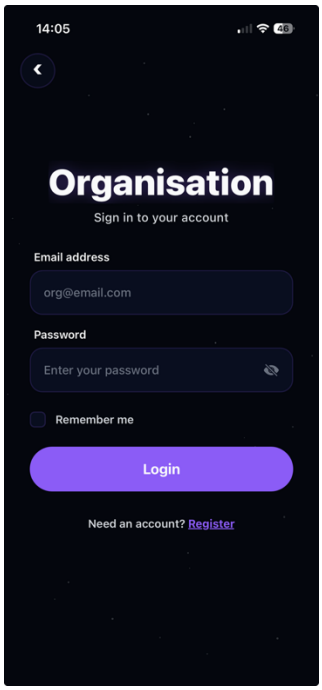


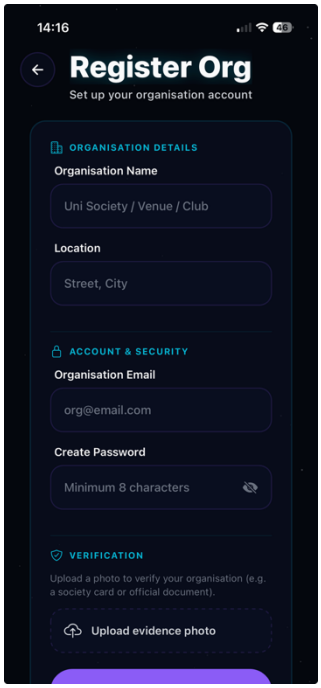




Organisation registration:

- Tap 'Login as Organisation' then the text at the bottom to create an account
- Enter your organisation's name (e.g. Uni society/club), your location, contact email, and a secure password
- Upload an evidence photo, so that your status as an organisation can be verified. This can be something showing that your society is associated with the university, or anything that shows you are who you say you are (verification of organisations has not been implemented yet, this is included in our future scope)
- Tap create account





Logging in (if you already have an account):

- Tap whichever login button. Corresponds to your role
- Enter your email and password
- Tap login

Logging out:

- Navigate to your profile, and then to your settings
- Scroll down to find the “log out” button
- Tap it, and confirm you want to log out

Remember to make sure that the “remember me” box is checked when you log in if you don’t want to fill out your credentials every time.

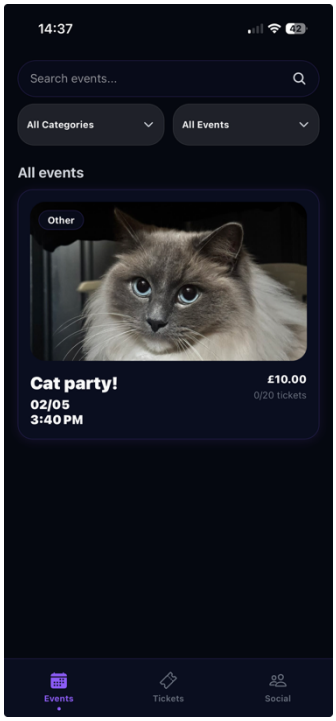
3. For students

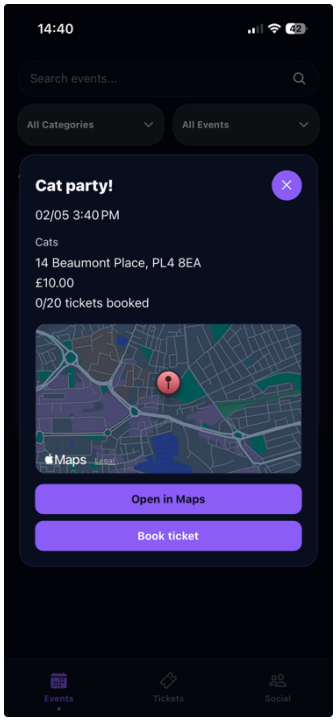
3.1. Discovering events

After logging in as a student, you land on the event feed – a scrollable list of upcoming events from organisations around the university.

You can narrow down the events using the **Day** and **Category** filters at the top of the feed. There is also a search bar, if you want to search for a specific event.

Tap any event card to open the full detail view showing the description, date, time, location, price, remaining capacity, and a map with the venue pinned. If you tap “Open in maps”, you’ll be redirected to your maps app, which is Apple maps by default, in case you need directions to the venue.





3.2. Booking an event

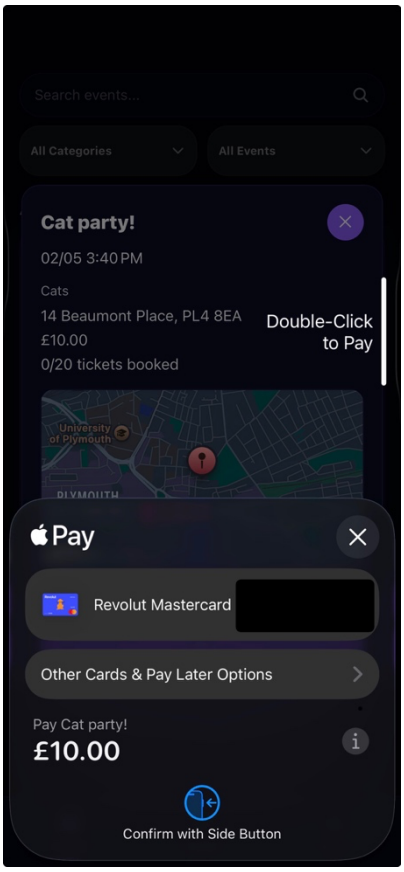
For free events:

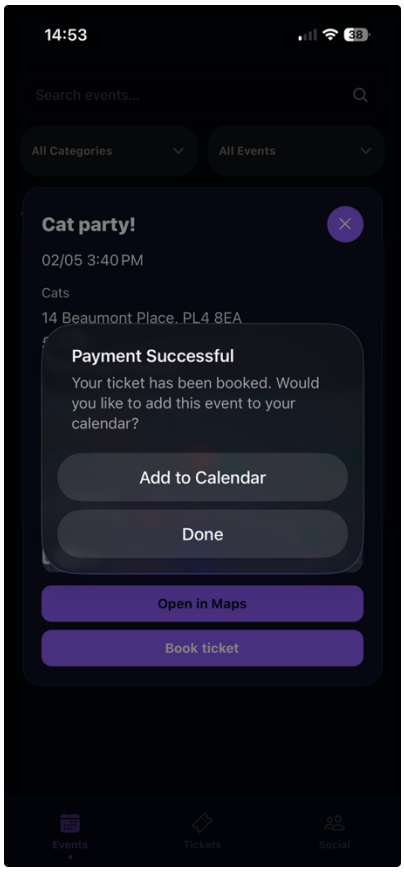
- Open the event and tap 'Book ticket'
- You will be given the option to add it to your calendar
- Ticket is confirmed, and will now appear in "Tickets"

For paid events:

- Open the event and tap 'Book ticket'
- You'll be able to pay for the ticket via Apple Pay
- Once payment is confirmed, choose whether to add ticket to calendar
- Booking confirmed, you can view it in "Tickets"

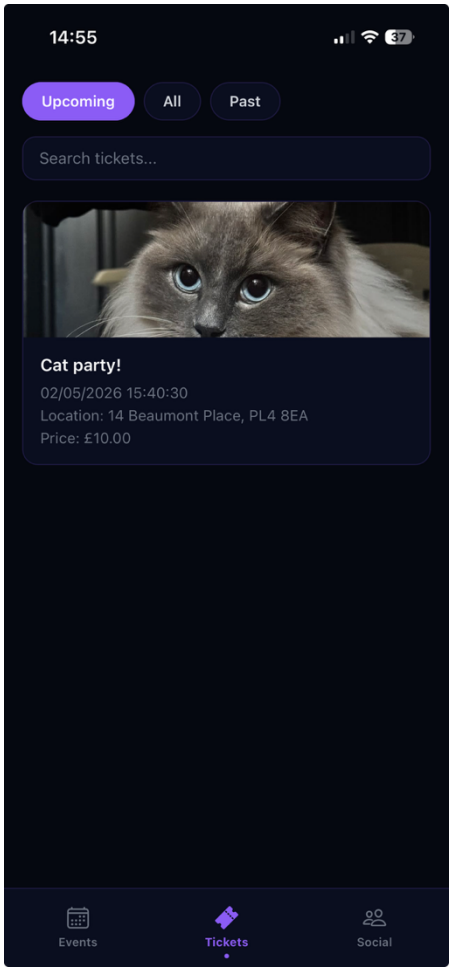
Payment is handled securely via Stripe. UniVerse never stores your card details





For this project, no "real" money is being handled, as Stripe has been implemented in 'test mode'

3.3. Viewing your tickets



Tap the “Tickets” tab in the bottom tab to view all of your bookings. Each ticket shows the event name, date, venue, and a QR code. The organiser scans this QR code at the door for entry — keep it accessible when you arrive.

You can choose which tickets you can see, using the tabs at the top of the screen. If a ticket has already been used or the date of the event has passed, that ticket will become “expired” or “used” so you will no longer be able to tap on it to see the QR code.

3.4. Social feed & following organisations

The social feed is a very useful tool for students, as you can use it to share highlights of any events you have attended. You can add a caption and any relevant hashtags to help people to find them more easily. There is a search bar at the top, where you can search for any hashtags, to filter the feed to show only posts you’re interested in or just show posts from specific accounts. You can also simply tap on the hashtags to automatically search a little easier. You can also show some love by liking posts or leaving a nice comment on them.

You can also follow any organisations or students you’re a particularly big fan of and when you do, whenever those you follow make a new post, or an organisation posts a new event, you’ll receive push notifications, so you don’t miss a thing.

You can also view your personal profile from the social feed, from where you can update your profile picture and password, and manage your notification preferences in your settings. This is also where you can log out from, or delete your profile along with all of your data, if you so please.

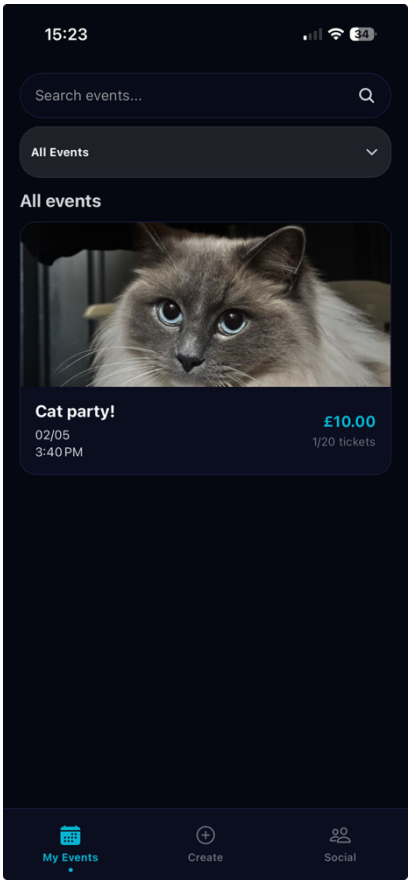
4. For organisations

4.1. Your dashboard

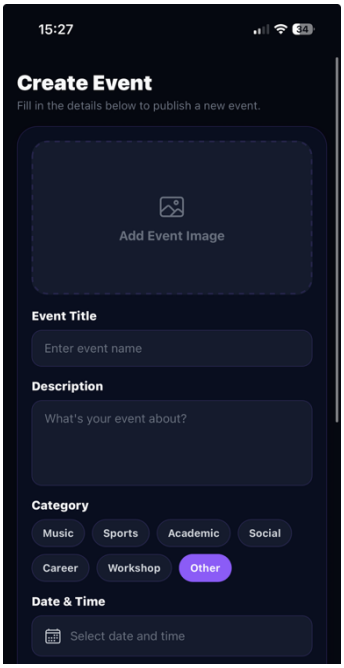
Logging in as an organisation takes you to your events tab, where you will see a list of every event you have posted.

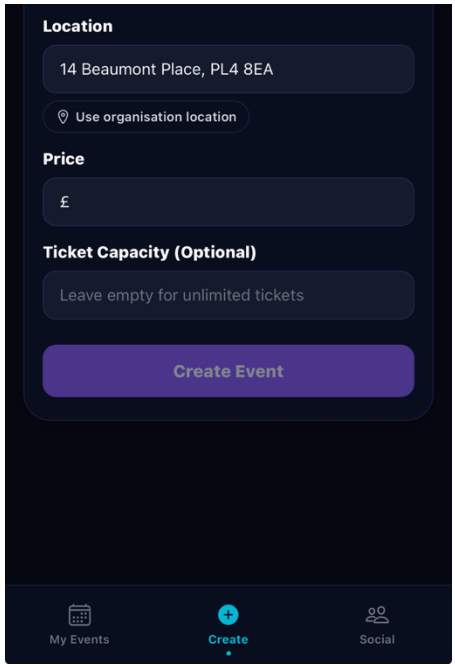


4.2. Creating a new event

Tapping the “Create” tab at the bottom takes you a form to fill out, where you simply enter all the necessary information about your event and once it’s filled out, just tap “Create event” to post it.

Please note: the minimum price for a paid event is £0.30 due to payment processing requirements, however you can just leave it blank if entry is free

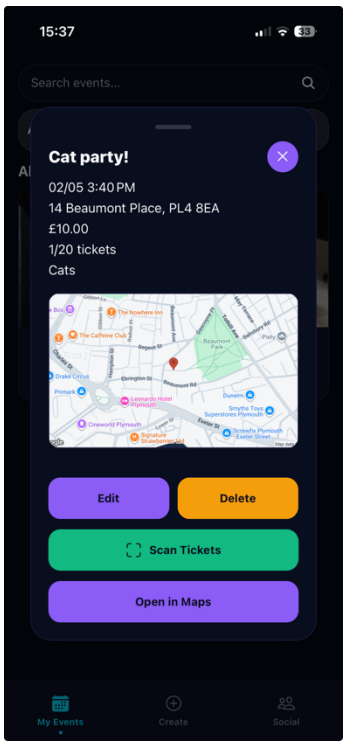


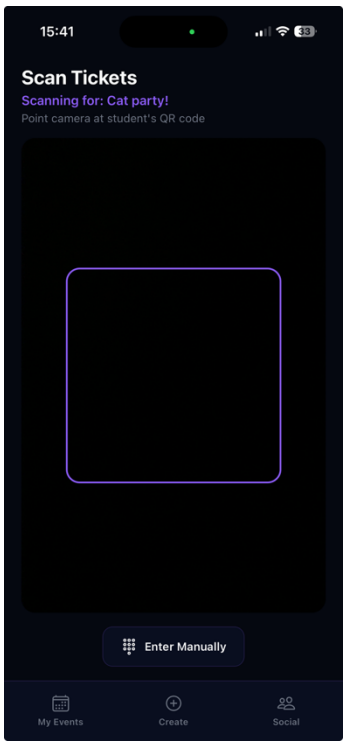


4.3. Event details

Tap any event which you have posted to bring up a detailed view, from which you can delete it, edit any and all of the details you set for it, scan tickets upon entry, or just keep track of how many tickets have sold.

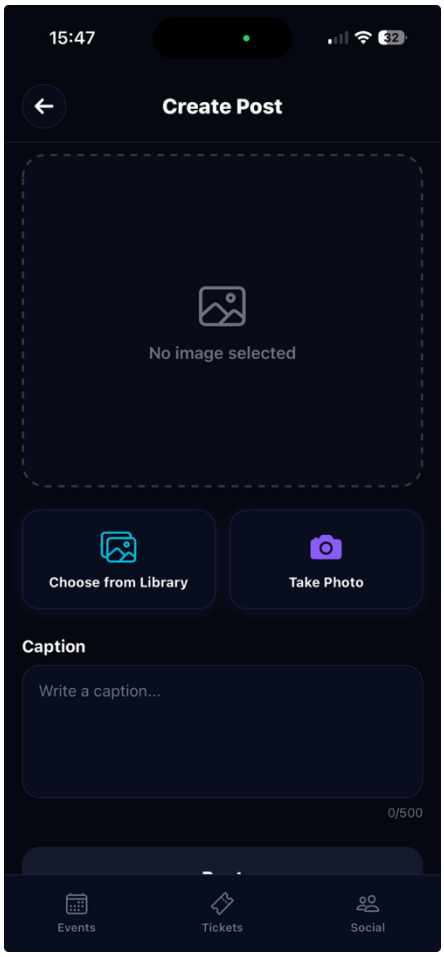
To scan a student's ticket, tap the "Scan tickets" button on this detailed view which will open a camera view. Then simply aim it at their QR code, at which point it will automatically scan and verify that it's for the correct event and hasn't been used already.





4.4. Social feed

This is used the same way in which a student would use it, however instead of posting your highlights of the event, you can create promotional posts to help push your events to a wider audience and hopefully get more people to come along. Simply tap the "+" button in the corner, select/take a photo to post, add a caption with a couple of hashtags, hit post, and any students who follow you will receive a push notification of what you've posted.



This is also where you can access your profile where, just like the students, you can update your profile picture, password and notification preferences, log out, and delete your account.

5. Notifications

UniVerse sends push notifications to keep you up to date with what's going on. Here is what triggers them:

Trigger	Who receives it
New event from a followed organisation	Student followers
New post from a followed organisation/student	Student followers
Someone likes your post	Post author
Someone comments on your post	Post author
Someone follows you	Whoever was followed
Ticket booking confirmed	Student who booked
Event reminder (24 hours before)	Students with a ticket

Upon launching UniVerse for the first time, it will ask you if you want to allow push notifications. If you said 'no' and change your mind, go to your device's Settings → Notifications → UniVerse and toggle as preferred.

6. Troubleshooting & FAQs

My ticket didn't appear after booking.
Your ticket should appear immediately in the "Tickets" tab. Try closing and reopening the app. If payment went through but no ticket appeared, contact your event organiser with your payment confirmation.

My payment failed.
Ensure you have enough money on the necessary card. Events must be priced at £0.30 or more in order for payments to go through; if you believe a mistake has been made and the event was priced incorrectly, please contact the organiser.

I can't find a specific event.
Make sure you don't have any filters applied that you aren't aware of.

My QR code won't scan:
Turn your screen brightness up fully. If the issue persists, show the organiser your booking in My Tickets as a manual confirmation.

I want to delete my account.
You can do that from your profile settings.

7. Privacy & your data

UniVerse stores the following information:

- Your name, username, and email address
- Your profile picture (if uploaded)
- Events you have booked
- Posts and comments you have made
- Organisations you follow

Your payment details are never stored by UniVerse — all card processing is handled by Stripe, a certified payment provider.

To request a copy of your data, please contact dyl.j.bennett@icloud.com
